### TO WHOM IT MAY CONCERN

Ref: Modular Movers/Modular Building Systems

Over the past two years I have had the distinct pleasure of working with Modular Movers/Modular Building Systems during construction and expansion of various camps used for worker accommodation during a \$2B Coal Seam Gas project in Queensland.

I found that nothing was too difficult for the staff, and they always, without fail, worked safely. Their approach to their duties and their work ethic was exemplary and it was indeed a pleasure to have the MBS staff working on this project where I was contracted as Lead HSSE Supervisor for the client.

Planning and execution of module moves from one camp to another, generally over distances of more than 400 km, was always completed without fuss or delay. For example, a move of 10 modules was completed from demobilisation at one camp to finalisation of construction at the new camp within one week.

The MBS system of planning always ensured that these moves occurred without fuss or delay. When modules were expected, they arrived, and within two days were ready for occupation. This was invariably the case, while another company, who was contracted to supply modules for some camps, encountered delays of, in some cases, three weeks.

The speed and obvious expertise with which these moves were completed by the MBS personnel rendered the task of inspecting the work a great pleasure. The camps supplied by MBS all exceeded 300 rooms, along with associated office, dining, recreation room, gymnasium and wet mess facilities.

When the supervisory staff said something would be done, it was done and always within the timeframe given. This made Modular Movers and Modular Building Systems a pleasure to work with and I have the greatest pleasure in recommending them to any prospective clients.

Kind regards

David Carter
